Mathematics

Questions from Paper 2 and Paper 4

You must have: a ruler marked in centimetres and millimetres, a protractor, compasses, a pen, an HB pencil and an eraser.
You may use a calculator.

Total marks

/ 82

Instructions

- Answer every question in the space provided on this paper.
- Write in black or dark blue ink. Pencil may be used for diagrams and graphs.
- Fill in your name, centre number and candidate number above.
- Show your working: a correct method can earn marks even if the answer is wrong.
- Unless a question says otherwise, give answers that are not exact to 3 significant figures, and angles in degrees to 1 decimal place.

Information

- This paper has 10 questions worth 82 marks in total.
- The marks for each question or part are shown in brackets, for example [3].

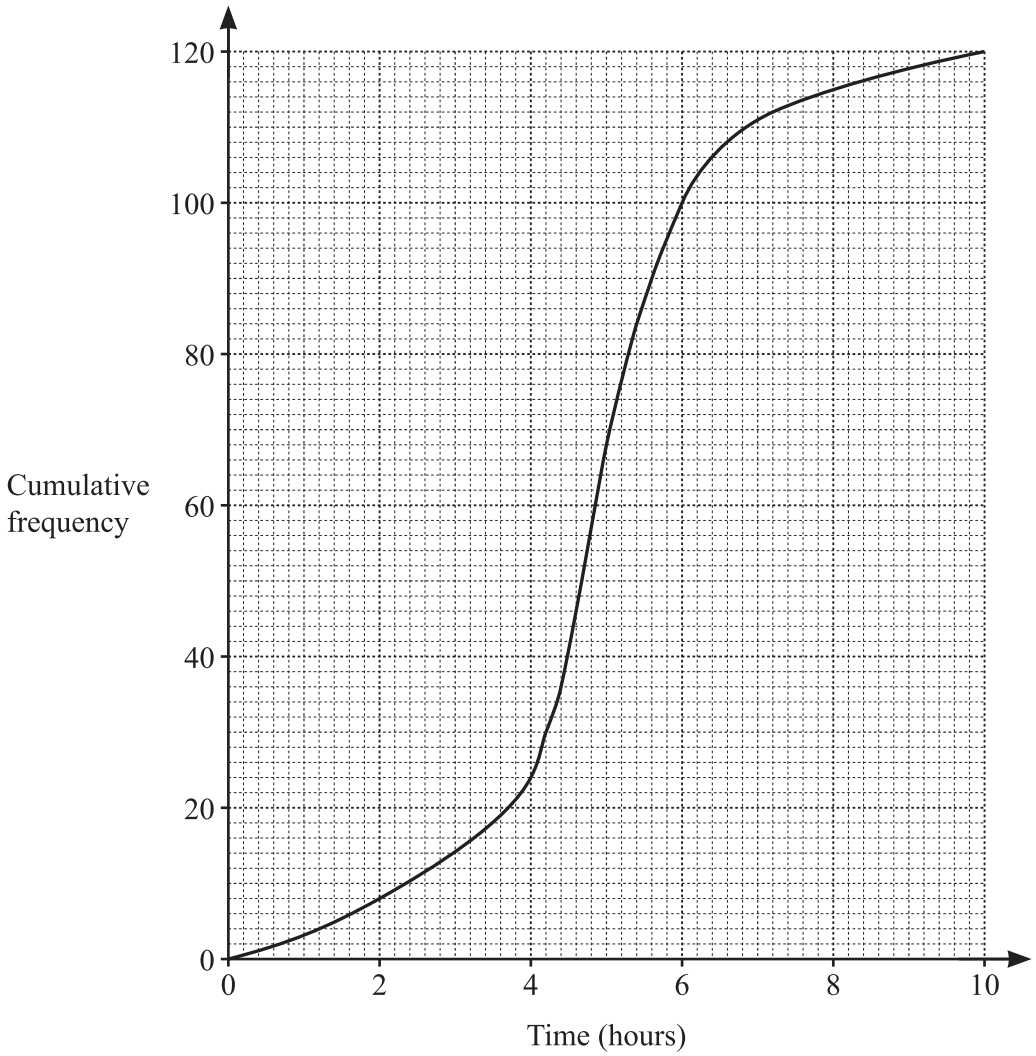

Advice

- Read every question through once before you write anything.
- Use the marks in brackets to judge how long to spend on each part.
- If you finish early, go back and check your working.

Print at 100% (Actual size) so diagrams keep their real measurements.

1 The time spent on the internet by each of 120 adults is recorded for one day.
The cumulative frequency diagram shows this information.

(a) Use the cumulative frequency diagram to find an estimate of the interquartile range.

..... h [2]

(b) 70% of the adults spent less than k hours on the internet.

Use the cumulative frequency diagram to find an estimate of the value of k.

$k =$ ..... [2]

2 The table shows some information about the heights of 200 plants.

Height (h cm)	Cumulative frequency
$h \leqslant 30$	6
$h \leqslant 40$	42
$h \leqslant 50$	76
$h \leqslant 60$	170
$h \leqslant 70$	190
$h \leqslant 80$	200

(a) Draw a cumulative frequency diagram to show this information.

[3]

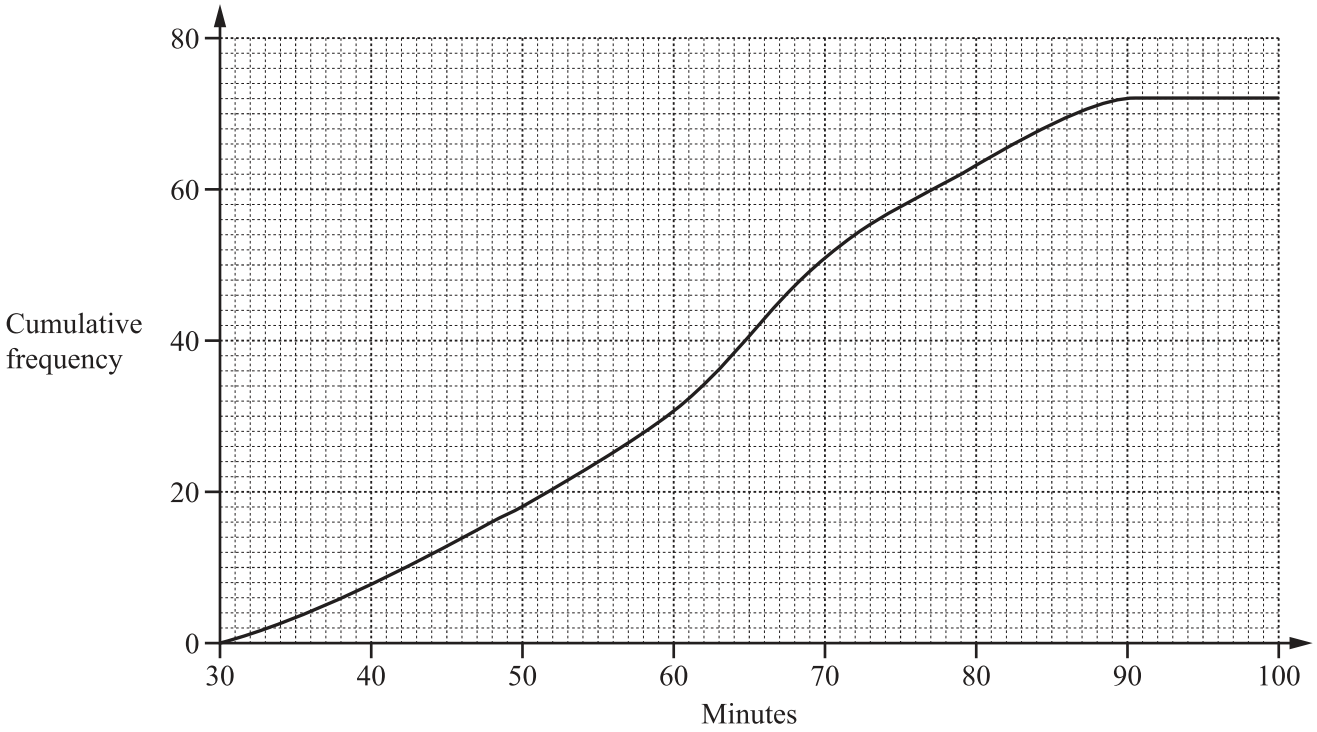

(b) Find an estimate of the 75th percentile.

.....cm [1]

3 72 students are given homework one evening.
They are told to spend no more than 100 minutes completing their homework.
The cumulative frequency diagram shows the number of minutes they spend.

(a) How many students spent more than 48 minutes completing their homework?

Answer(a) ..... [2]

(b) Find

(i) the median,

Answer(b)(i) ..... [1]

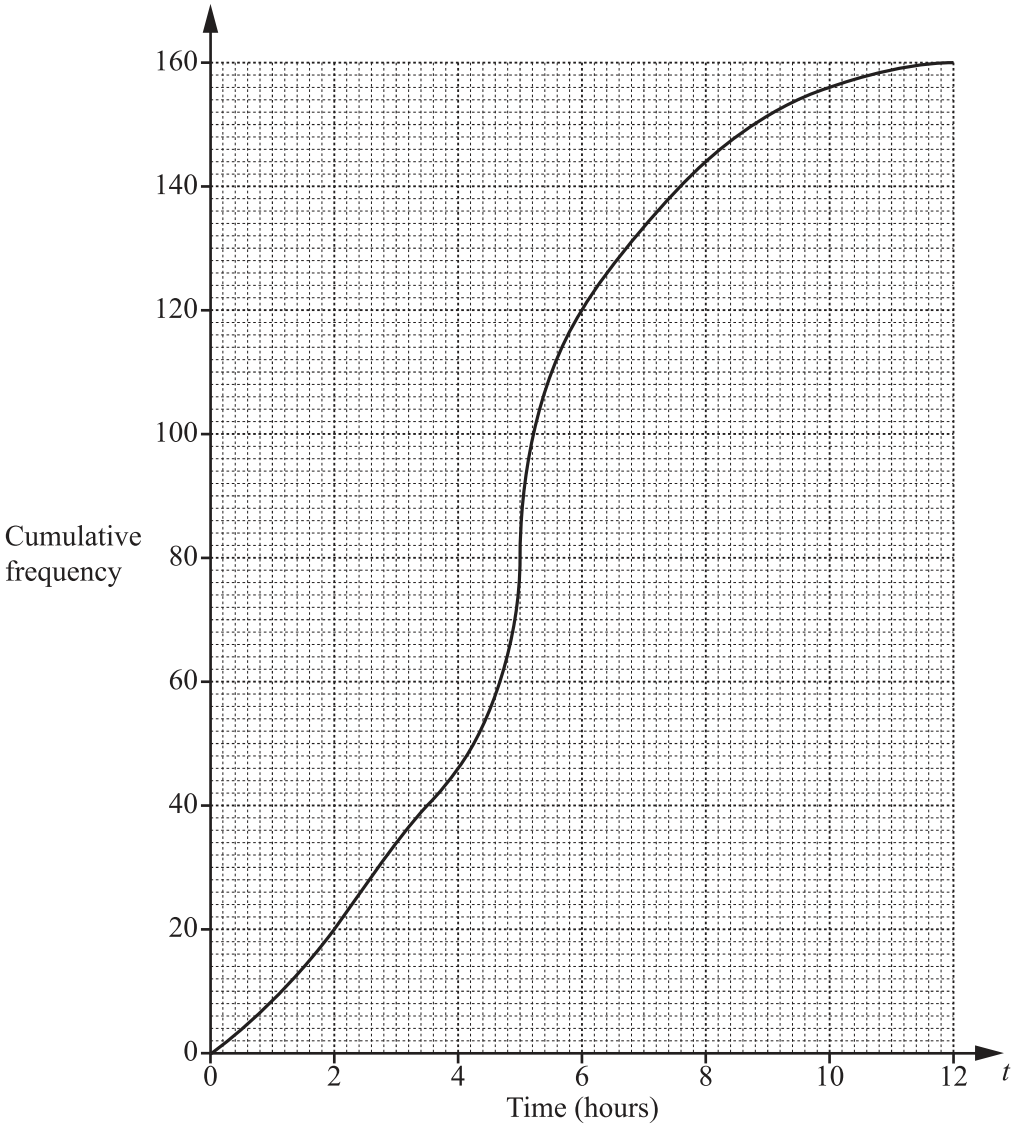

(ii) the inter-quartile range.

Answer(b)(ii) ..... [2]

4 160 students record the amount of time, t hours, they each spend playing computer games in a week. This information is shown in the cumulative frequency diagram.

(a) Use the diagram to find an estimate of

(i) the median,

..... hours [1]

(ii) the interquartile range.

..... hours [2]

(b) Use the diagram to complete this frequency table.

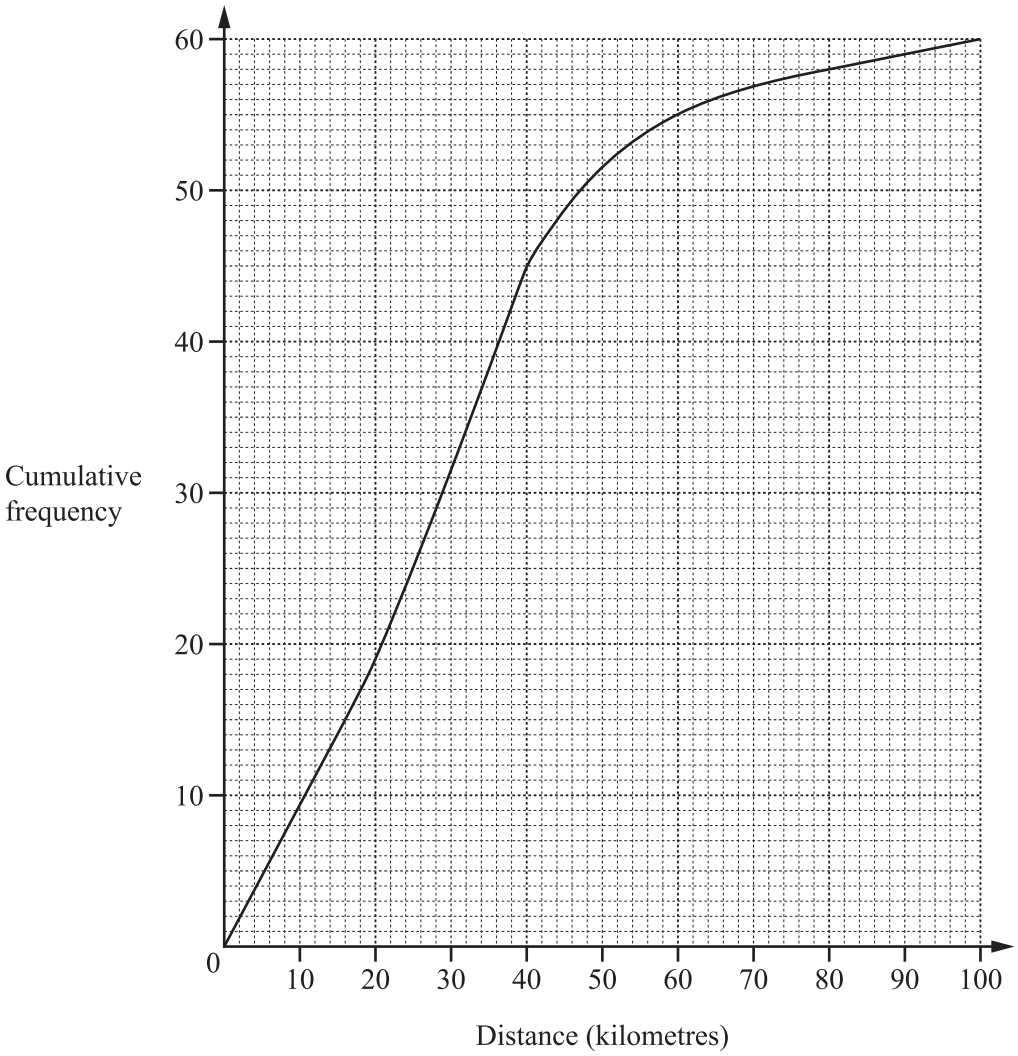

Time (t hours)	$0 < t \leqslant 2$	$2 < t \leqslant 4$	$4 < t \leqslant 6$	$6 < t \leqslant 8$	$8 < t \leqslant 10$	$10 < t \leqslant 12$
Frequency	20			24	12	4

5 The cumulative frequency diagram shows information about the distances travelled, in kilometres, by 60 people.

Find

(a) the 80th percentile,

Answer(a) ..... km [2]

(b) the inter-quartile range,

Answer(b) ..... km [2]

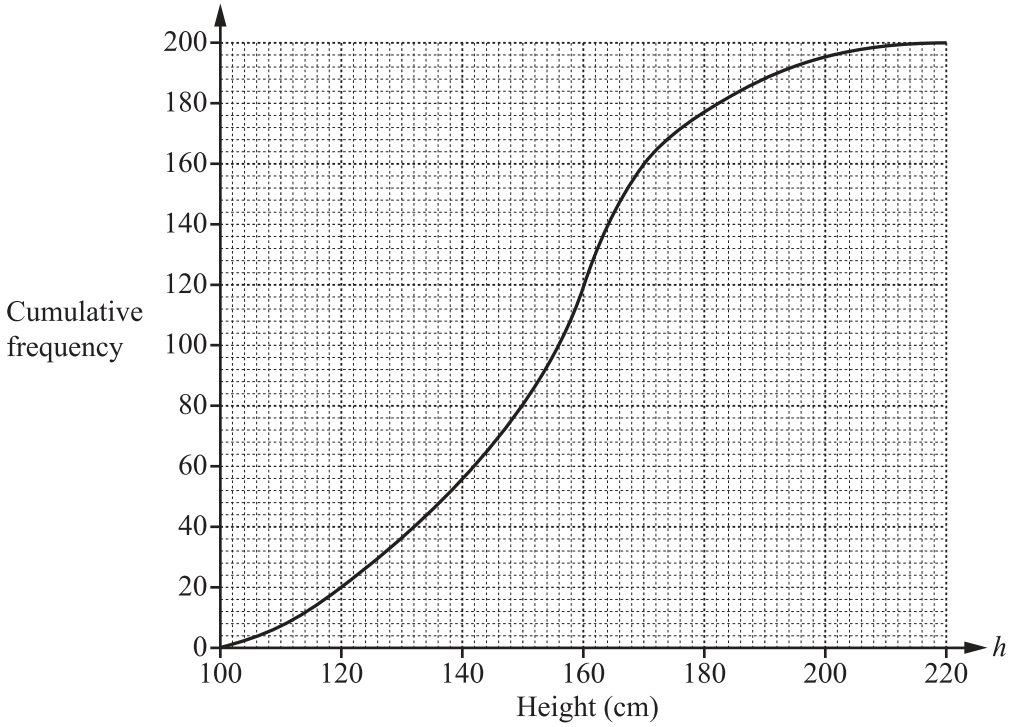

(c) the number of people who travelled more than 60 km.

Answer(c) ..... [2]

6 Simon records the heights, h cm, of 200 sunflowers in his garden.
The cumulative frequency diagram shows this information.

(a) Find the number of these sunflowers that have a height of more than 160 cm.

..... [2]

(b) Sue records the heights, h cm, of 200 sunflowers in her garden.
The cumulative frequency table shows this information.

Height (h cm)	Cumulative frequency
$h \leqslant 100$	0
$h \leqslant 110$	20
$h \leqslant 120$	48
$h \leqslant 130$	100
$h \leqslant 140$	140
$h \leqslant 150$	172
$h \leqslant 160$	188
$h \leqslant 170$	200

On the grid above, draw another cumulative frequency diagram to show this information. [3]

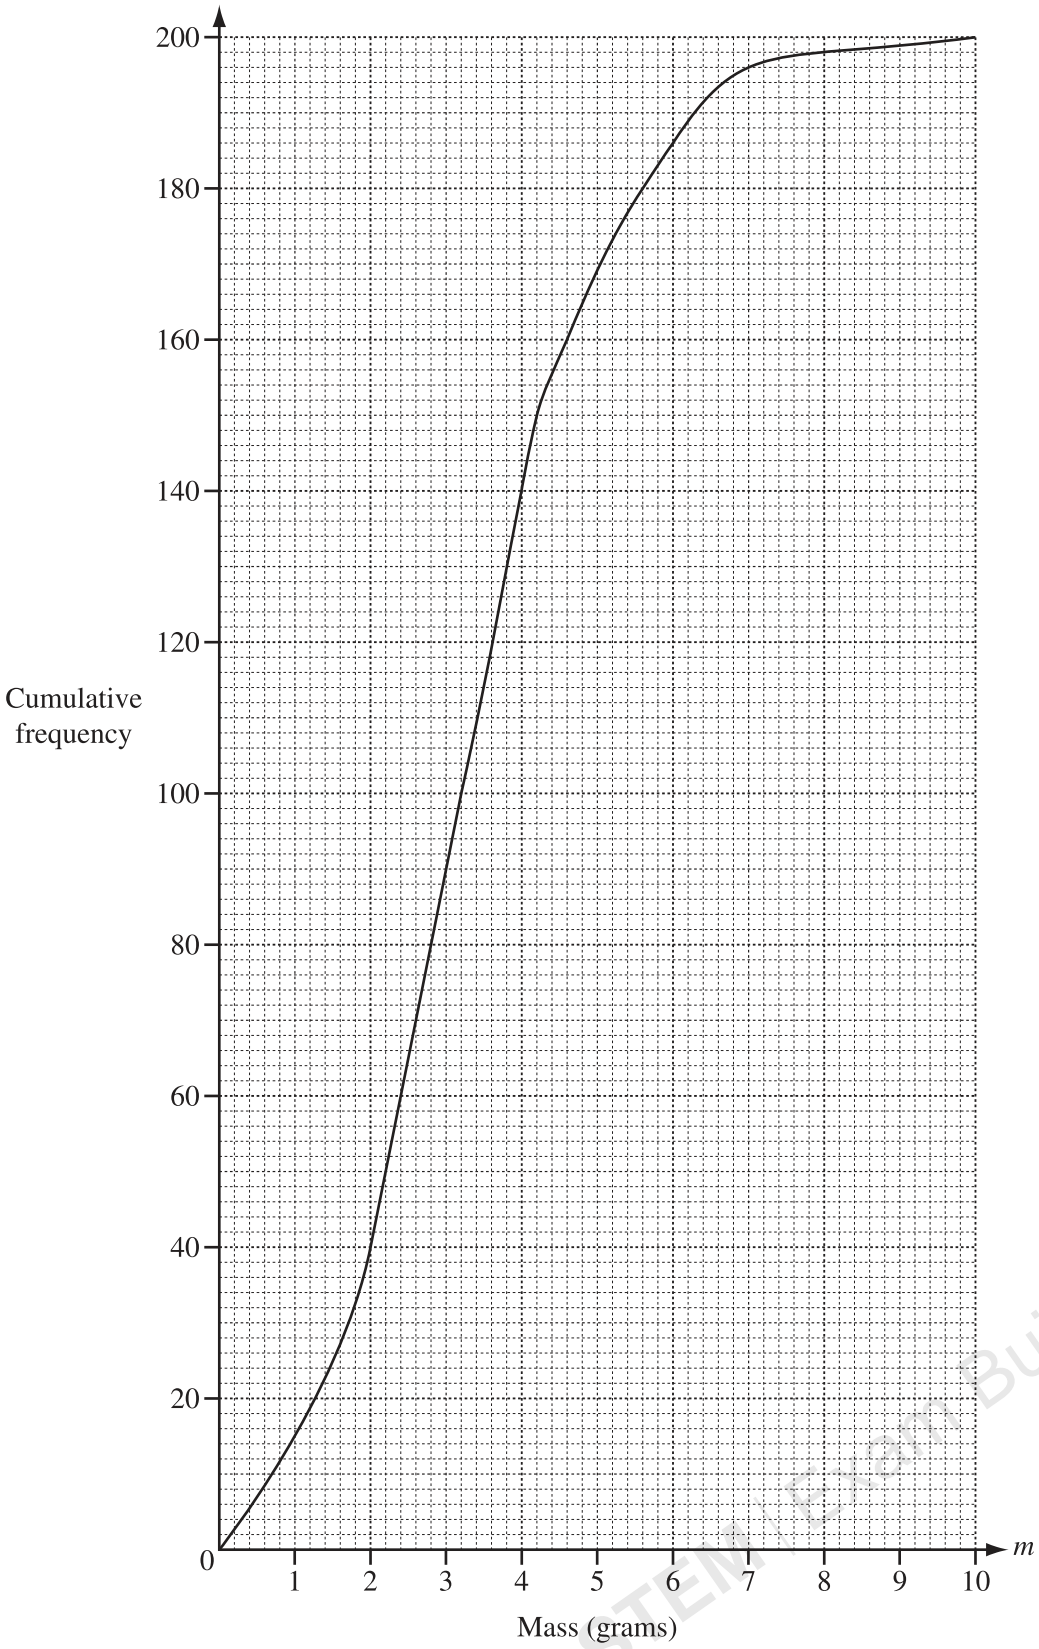

(c) Work out the difference between the median heights of Simon's sunflowers and Sue's sunflowers.

..... cm [2]

7 200 students estimate the mass (m grams) of a coin.
The cumulative frequency diagram shows the results.

STEM Exam Builder

(a) Find

(i) the median,

Answer(a)(i) ..... g [1]

(ii) the upper quartile,

Answer(a)(ii) ..... g [1]

(iii) the 80th percentile,

Answer(a)(iii) ..... g [1]

(iv) the number of students whose estimate is 7 g or less.

Answer(a)(iv) ..... [1]

(b) **(i)** Use the cumulative frequency diagram to complete the frequency table.

Mass (m grams)	$0 < m \leqslant 2$	$2 < m \leqslant 4$	$4 < m \leqslant 6$	$6 < m \leqslant 8$	$8 < m \leqslant 10$
Frequency	40				2

[2]

(ii) A student is chosen at random.
The probability that the student estimates that the mass is greater than M grams is 0.3.

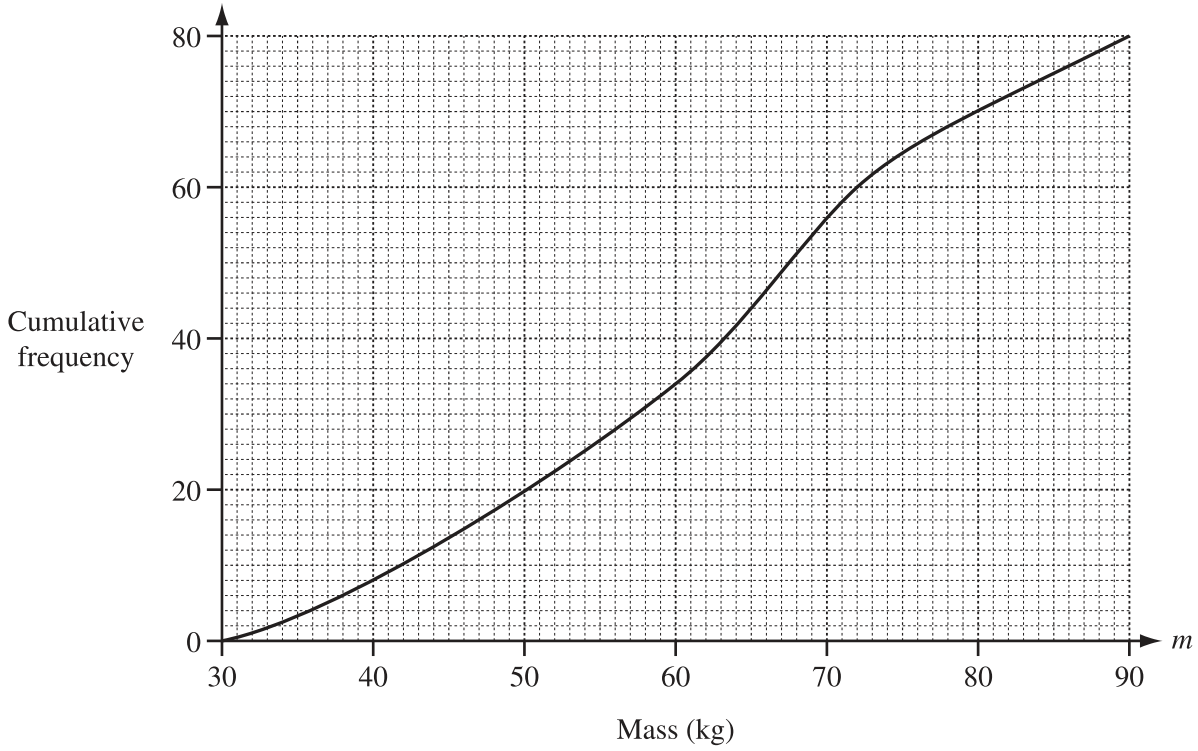

Find the value of M.

Answer(b)(ii) M = ... [2]

8 80 boys each had their mass, m kilograms, recorded.
The cumulative frequency diagram shows the results.

(a) Find

(i) the median,

Answer(a)(i) ..... kg [1]

(ii) the lower quartile,

Answer(a)(ii) ..... kg [1]

(iii) the interquartile range.

Answer(a)(iii) ..... kg [1]

(b) How many boys had a mass greater than 60kg?

Answer(b) ..... [2]

STEM | Exam Builder

(c) (i) Use the cumulative frequency graph to complete this frequency table.

Mass, m	Frequency
$30 < m \leqslant 40$	8
$40 < m \leqslant 50$	
$50 < m \leqslant 60$	14
$60 < m \leqslant 70$	22
$70 < m \leqslant 80$	
$80 < m \leqslant 90$	10

[2]

(ii) Calculate an estimate of the mean mass.

Answer(c)(ii) ..... kg [4]

(a)(i) Cumulative frequency (a)(ii) Cumulative frequency (a)(iii) Range and interquartile range
(b) Cumulative frequency (c)(i) Cumulative frequency (c)(ii) Averages from grouped data

10 A school nurse records the height, h cm, of each of 180 children.
The table shows the information.

Height (h cm)	$60 < h \leqslant 70$	$70 < h \leqslant 90$	$90 < h \leqslant 100$	$100 < h \leqslant 110$	$110 < h \leqslant 115$	$115 < h \leqslant 125$
Frequency	8	26	35	67	28	16

(a) Calculate an estimate of the mean.
Give your answer correct to 1 decimal place.

..... cm [4]

(b) In a histogram showing the information, the height of the bar for the interval $60 < h \leqslant 70$ is 0.4 cm.

Calculate the height of the bar for each of the following intervals.

$115 < h \leqslant 125$ ..... cm

$110 < h \leqslant 115$ ..... cm

$70 < h \leqslant 90$ ..... cm [3]

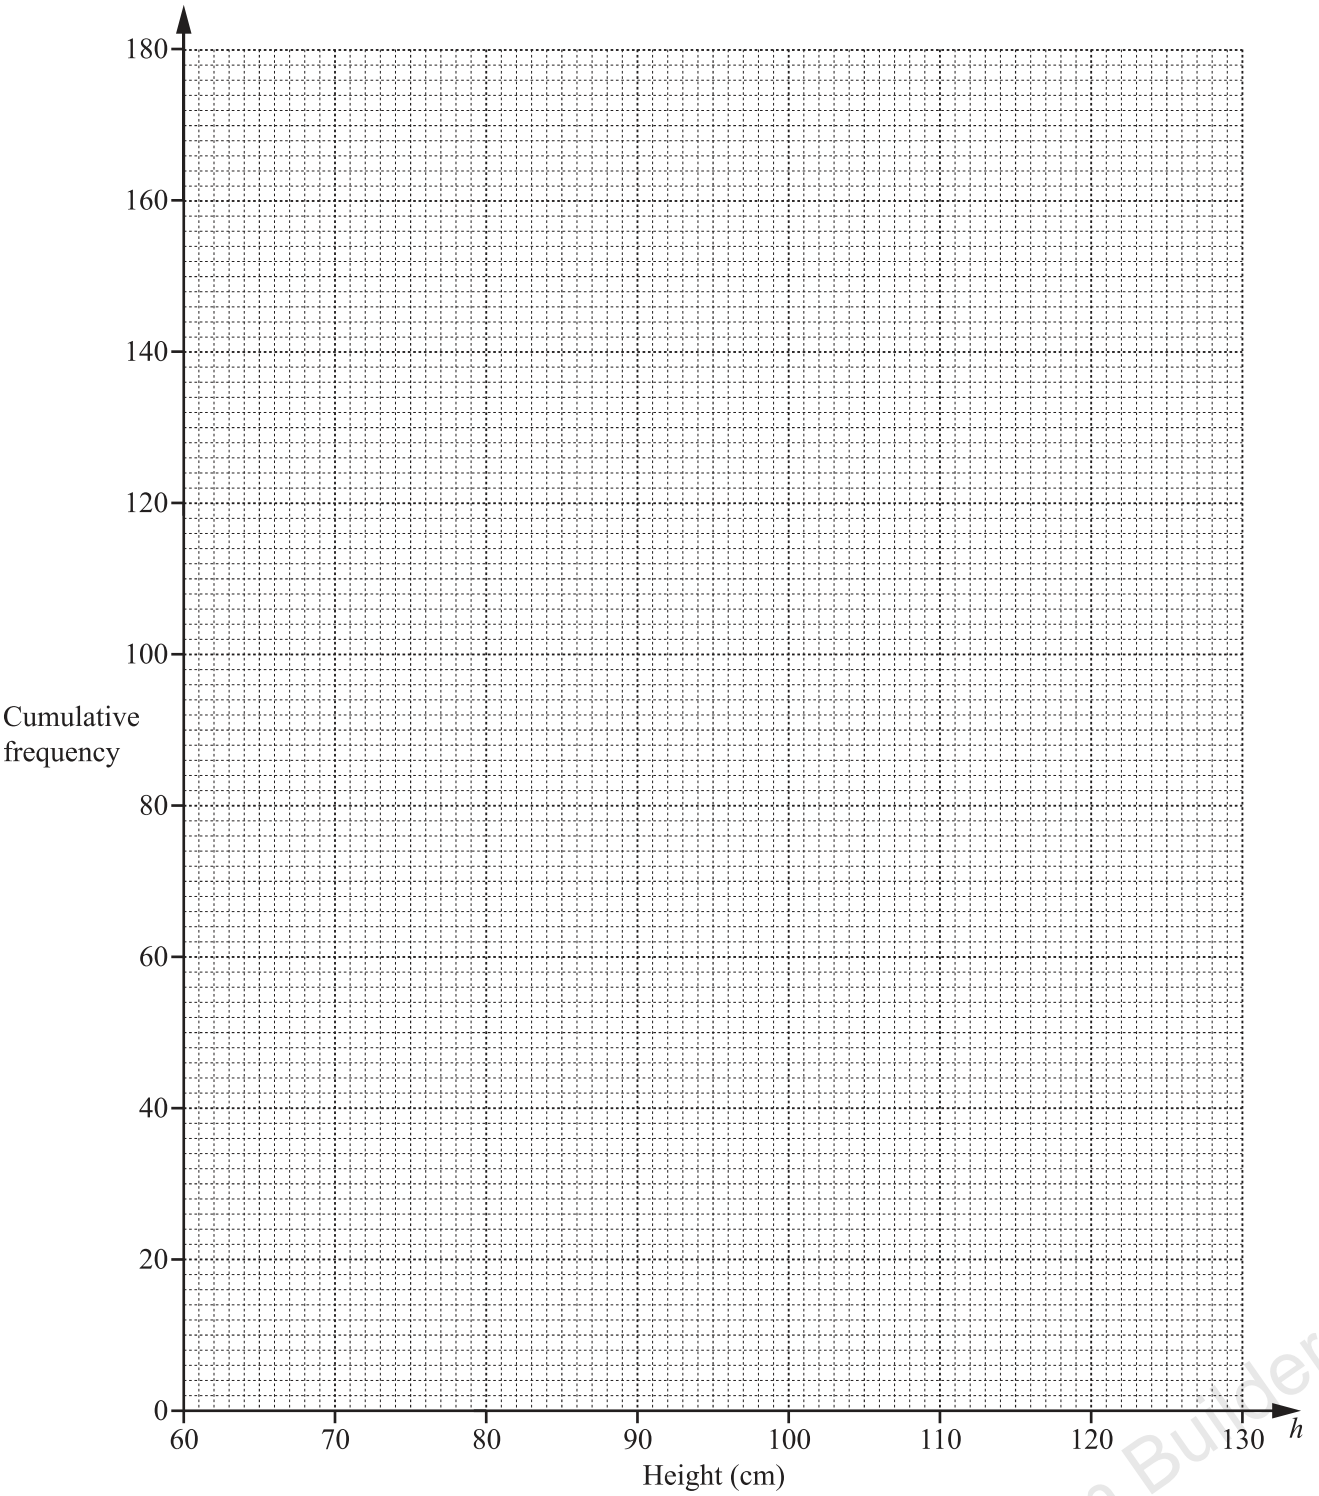

(c) Complete the cumulative frequency table below.

Height (h cm)	$h \leqslant 70$	$h \leqslant 90$	$h \leqslant 100$	$h \leqslant 110$	$h \leqslant 115$	$h \leqslant 125$
Cumulative frequency						180
