Mathematics

Questions from Paper 1, Paper 2, Paper 3 and Paper 4

You must have: a ruler marked in centimetres and millimetres, a protractor, compasses, a pen, an HB pencil and an eraser.
Questions 2, 4, 6, 8 (Paper 1): calculator allowed.
Questions 7, 9-10 (Paper 2): no calculator.
Questions 1, 3 (Paper 3): calculator allowed.
Question 5 (Paper 4): calculator allowed.

Total marks

/ 29

Instructions

- Answer every question in the space provided on this paper.
- Write in black or dark blue ink. Pencil may be used for diagrams and graphs.
- Fill in your name, centre number and candidate number above.
- Show your working: a correct method can earn marks even if the answer is wrong.
- Unless a question says otherwise, give answers that are not exact to 3 significant figures, and angles in degrees to 1 decimal place.

Information

- This paper has 10 questions worth 29 marks in total.
- The marks for each question or part are shown in brackets, for example [3].

Advice

- Read every question through once before you write anything.
- Use the marks in brackets to judge how long to spend on each part.
- If you finish early, go back and check your working.

Print at 100% (Actual size) so diagrams keep their real measurements.

1 Find the value of $\sqrt{1.96}$.

..... [1]

Powers and roots Click for more variations

2 Find the value of

(a) $\sqrt[3]{2744}$,

Answer(a) ..... [1]

(b) 6^4.

Answer(b) ..... [1]

(a) Powers and roots (b) Powers and roots Click for more variations

3 Find the value of 8^5.

Give your answer correct to 3 significant figures.

..... [2]

Significant figures Click for more variations

4 Work out $\dfrac{\sqrt[3]{512}}{6^2}$.

Write your answer as a fraction in its lowest terms.

..... [2]

6 A circle has radius 7 cm.
A square has side x cm.
The circumference of the circle is the same length as the perimeter of the square.

Find the value of x.
Give your answer in terms of π.

$x =$ ..... [3]

Area and circumference of circles Click for more variations

7 Rationalise the denominator and simplify.

$$\frac{20}{4+\sqrt{6}}$$

Surds Click for more variations

8 **(a)** Kat has a method for finding the difference between two square numbers, $a^2 - b^2$.
Her method is

(the sum of a and b) $\times$ (the difference between a and b) .

She shows her method for $17^2 - 13^2$.

$17^2 - 13^2$

$= (17 + 13) \times (17 - 13)$

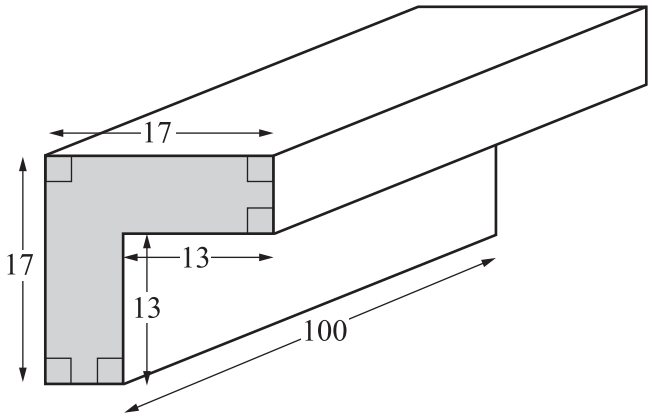

$= 30 \times 4$

$= 120$

Work out $29^2 - 21^2$ using Kat's method.

..... [2]

(b) In this part, all lengths are in centimetres.

NOT TO SCALE

The diagram shows a prism.

Work out the volume of the prism.

..... cm^3 [2]
