Straight-line graphs and gradient

Time allowed: 40 minutes

Subject code **0580**

Mathematics

Questions from Paper 1, Paper 2 and Paper 3

You must have: a ruler marked in centimetres and millimetres, a protractor, compasses, a pen, an HB pencil and an eraser.
You may use a calculator.

Total marks

/ 34

Instructions

- Answer every question in the space provided on this paper.
- Write in black or dark blue ink. Pencil may be used for diagrams and graphs.
- Fill in your name, centre number and candidate number above.
- Show your working: a correct method can earn marks even if the answer is wrong.
- Unless a question says otherwise, give answers that are not exact to 3 significant figures, and angles in degrees to 1 decimal place.

Information

- This paper has 10 questions worth 34 marks in total.
- The marks for each question or part are shown in brackets, for example [3].

Advice

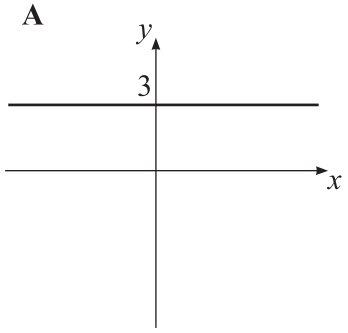

- Read every question through once before you write anything.
- Use the marks in brackets to judge how long to spend on each part.
- If you finish early, go back and check your working.

Write down the letter of the graph that shows these lines.

(a) $x = 3$

..... [1]

(b) $y = 3x$

..... [1]

(a) Drawing straight-line graphs (b) Drawing straight-line graphs Click for more variations

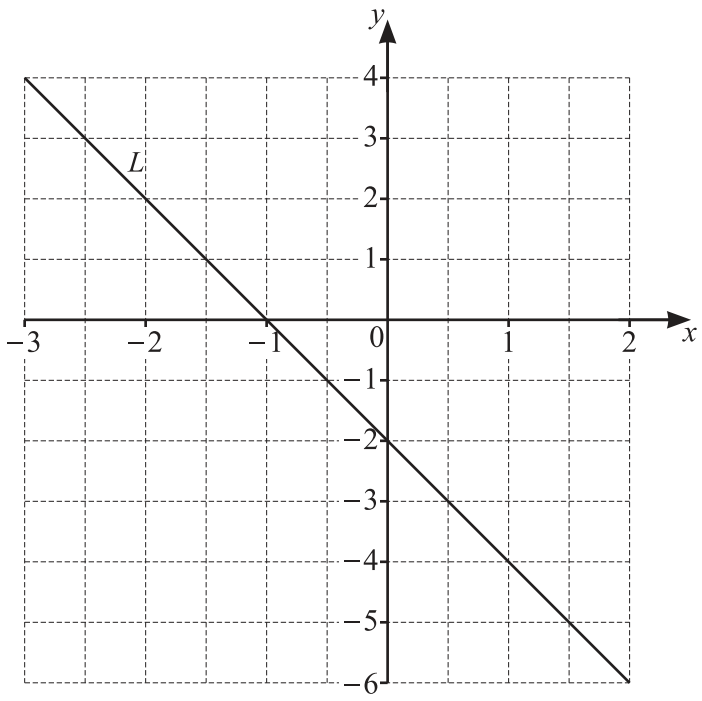

2 Find the gradient of the line joining the points $(-2, 7)$ and $(3, 1)$.

..... [2]

Gradient of a line Click for more variations

4

Point A has co-ordinates (3, 6).

(a) Write down the co-ordinates of point B.

(..... , ...) [1]

(b) Find the gradient of the line AB.

..... [2]

(a) Coordinates (b) Gradient of a line Click for more variations

5 **(a)** Line A has equation $y = 3x + 1$.
Line B has equation $y = 3x - 1$.

Draw a ring around the description that is correct.

Line A intersects line B	Line A has a steeper gradient than line B	Line A is perpendicular to line B
Line A is parallel to line B	Line A and Line B intersect the y-axis at the same point	

[1]

(b)

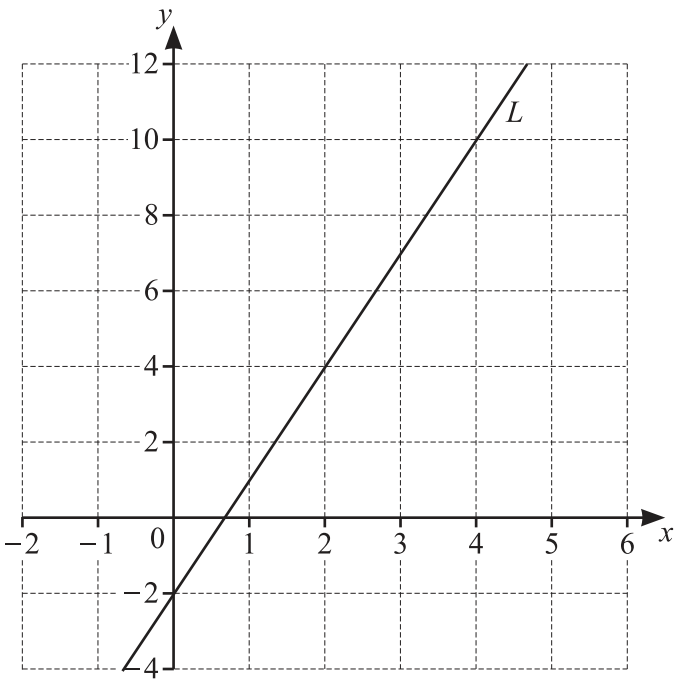

On the grid, draw the graph of $y = 2x - 1$.

[2]

(a) Parallel lines (b) Drawing straight-line graphs Click for more variations

7 A line has gradient 5.
M and N are two points on this line.
M is the point $(x, 8)$ and N is the point $(k, 23)$.

Find an expression for x in terms of k.

$x =$ ..... [3]

Gradient of a line Click for more variations

8

The line $x+y=7$ is drawn on the grid.

(a) On the grid, draw the line $y=2x+1$. [2]

(b) Use your graph to solve these simultaneous equations.

$$x+y=7$$
$$y=2x+1$$

$x =$ .....

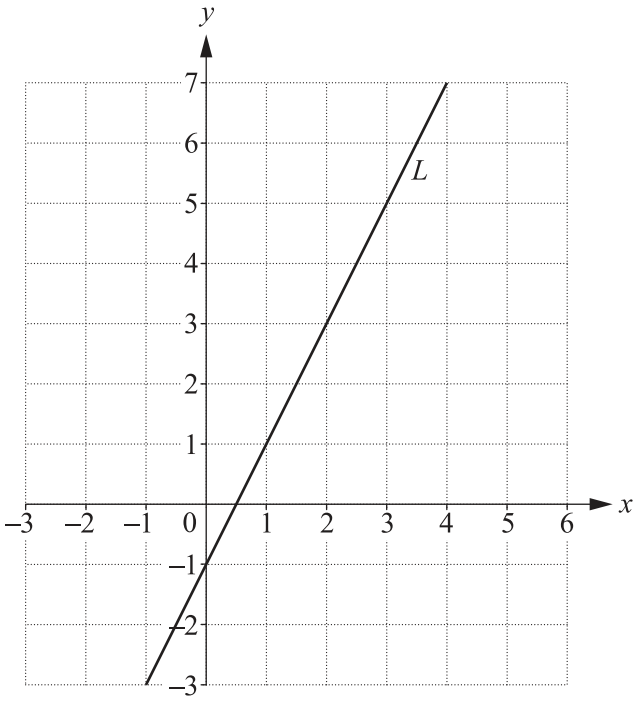

$y =$ .....

10

(a) Find the gradient of the line l.

Answer(a) ..... [2]

(b) **(i)** Complete the table below for $x + 2y = 6$.

x	0	2	
y			0

[3]

(ii) On the grid, draw the line $x + 2y = 6$ for $-4 \leqslant x \leqslant 6$. [2]

(c) The equation of the line l is $4x + 3y = 4$.

Use your diagram to solve the simultaneous equations $4x + 3y = 4$ and $x + 2y = 6$.

Answer(c) $x =$ .....

$y =$ ..... [2]

(a) Gradient of a line (b)(i) Drawing straight-line graphs (b)(ii) Drawing straight-line graphs

(c) Plotting curves and graphical solutions Click for more variations
